

## QUALITY AND ENVIRONMENT POLICY

Array Plàstics SL and Array Products SA de CV companies are dedicated to the injection and assembly of plastic parts.

This activity is oriented in achieving the overall satisfaction of the customer in **the long term**, offering the highest quality in the product, in the service, in the cost and above all, in the personal treatment, looking for the root cause of the problem, or the need of the client to present efficient solutions.

Only the **highest quality at competitive prices** will guarantee the development of the company in the long term. To maintain and increase the competitiveness, quality and environmental development of the company, we rely on **continuous improvement** and the constant search for best practices.

The quality objective will always be to move towards **0 defects** with the continuous improvement of all the **company's processes**. To achieve this goal, the company hopes and appreciates the contribution of each and every one of the staff, and for this reason will continue with the promotion of **training, personal development and motivation of all staff**.

In this sense, the full compliance with the practices that derive from the **IATF 16949 standard** must serve as a guide to ensure the good direction of the actions we undertake.

In addition, the CEO undertakes to comply with all **legal, customer and other requirements that apply to it**, and takes into account internal and external factors that affect it. According to ISO 14001, it is committed to eliminating special waste as much as possible, to reduce non-special waste, to optimize energy consumption,.. and in general to **anticipate and minimize pollution** associated with activities using clean technologies with the ultimate goal of **protecting the environment**.

To achieve these objectives we rely on the **Manual of the Integrated Management System** that we will evolve with the participation of all workers, customers, suppliers and collaborators.

Array plastics CEO.
